Thursday, July 16, 1936

No. 9

Published in the interest of the residents of Champion and District.

The Beach Glowman is a distinctly modern all cast range, possessing many new and exclusive refinements which improve cooking performance and permit added convenience.

Mr. and Mrs. Jack Kulpas have returned after a pleasant vacation enjoyed at the coast.

No longer need you rely on mere claims and gossamer-kissinging your refrigerator. Before you buy, demand proof that the refrigerator meets all five standards for dependable home refrigeration. Ask for the facts that reveal the hidden qualities in Frigidaire.

Deeter, this is Mr. Henpeck, my wife just has been for pay. If you are out this way next week or the week after

ton might drop in and see her.

Fanning season is here. We have in stock canvas racks and the large old pack model kettle complete with the rack, this item is very reasonable.

Day Dow, Liddle Parham and friends are spending a few days at Waterton Lakes.

Just received shipment of crocks, bowl sets in assorted colors, casseroles and oven ware, the prices are right.

The Curse of Hard Licker
A child brought to the hospital a note requesting "Coke and Cider." Some concentration was necessary to fill the order with the needed peroxide of hydrogen.

The Stewart-Warner Miracle radio is the premium value in 1936—firm radio. Costing

although only about an hour to operate, as against up to be for conventional sets, this model gives you practically 50 p.e. greater undistorted volume, clear sweet tone... sharp selectivity... and unusual distance.

F. Clever wants to know why it was necessary for Kulpas to buy some new fuses as soon as he got back.

Gill, Campbell and Gatzky attended the races at Chesholm Wednesday.

Beatty Washers, both gas and electric, at reasonable prices and terms if desired.

Hon. Maynard Explained Use Prosperity Certificate

A capacity audience greeted Hon. Lucien Maynard M. L. A. at the Social Credit meeting held in the Champion Community Hall Tuesday night. There were also on the platform Rev. J. Hansell M. P., Jas. Howley M. L. A. and Rev. P. Dawson M. L. A. S. O. Millin, vice president of the local Group occupied the chair and called on Rev. Dawson to address the meeting. Mr. Dawson referred feelingly to the death of a much respected zone member, Mr. A. J. Proff of Mossleigh, whose funeral he conducted today. He surveyed the array of "artillery" on the platform, modestly terming the first two speakers, the smaller guns, but Jas. Howley M. L. A. for Macleod Constituency, who followed, disclosed the fact that he and Mr. Dawson were often in the thickest of the fight. Mr. Hartley went on to say that members elected went to Edmonton with a definite purpose in view, and urged those who sent them to have faith in the Government which was the first in the history of the province that was non political, and elected by the people, for the people. He asked for the co-operation of all in putting over the Prosperity Bonds which were designed to put back to work many who were unemployed, and provide them with a decent living.

Rev. J. Hanson, M. P. Federal Riding Macleod followed with some impressions of Ottawa and said that the Social Credit members though in the minority, had made themselves heard on many occasions during their first session. They felt the opposition to anything in the way of monetary reform, and the influence of High Finance in the government, Reform in Economics increased purchasing power on the credit of the Province, and now that the general scheme of Social Credit was being started there was sure to be opposition from certain quarters, and therefore, still need of support.

Hon. Lucien Maynard dealt first with Prosperity Bonds and their use, a new medium of exchange and purchasing power, and the reason that some wholesale dealers were unwilling to accept them, usually those with eastern connections, but there was no boycotting of firms ever suggested, only listing of those who were willing to co-operate with the government. Mr. Maynard explained the action of the government imposing a 2 p.e. Ultimate Consumers tax instead of 4 p.e. as first imposed which would have raised enough money to pay the Provincial bonded in indebtedness, and the loan from the Federal government to enable them to carry on to the end of the fiscal year. He defended the Refunding Bill and the decision against joining the Loan Council and forfeiting their autonomy, and this was the first step towards breaking away from the present financial system.

Mr. Maynard urged his hearers not to be influenced by press reports which were often incorrect but to continue to have faith in the Premier to carry out what he had promised. In conclusion Hon. L. Maynard stated that another important step towards the introduction of Social Credit would shortly be made known, probably after the elections to be held in Edmonton. At the close of meeting, questions were invited, but none were forthcoming, the speakers evidently having satisfied their hearers on all points.

Welcome Grandmothers

Grandmother's Day at the Champion W. I. was a pleasing affair in charge of Mrs. Hummel and Mrs. Bond. The guests of honor present were Mesdames Sisson, Jopling, Gastator, Little, Whitlock, Pratt, Ulrich, Bond, Boushler and Clever.

The assembly was in the always hospitable home of the president, who began proceedings with a charming speech of welcome. It was resolved during the business session to assist a young artist of the community who has recently won a scholarship.

Mrs. Bostin delivered a valedictory on "The Union Jack, the Flag of the British Empire, its traditions, its history, its prestige" which traced its origin from saints and heroes through long brave years of battles, alliances and triumphs. Incidentally the Institute has lost its own flag, this is a big Union Jack, which was once carefully mended and darned. Will the patriotic club or organization that borrowed it last reveal its whereabouts?

After the address of the day Mrs. Bond took charge of the program that consisted of a toast by June and Betty Ashmore, a solo by Dorothy Hummel, the toast to the grandmothers was proposed by Mrs. J. Walker who gave a fine oration. This was responded to by Mrs. Boushler and drank Ashmore's. Some grandmothers recited the first piece they remembered having learned.

As was anticipated, the lunch provided by Mrs. Watkins and the hostesses was grand (cheers) Photographs were taken, and a prize given to the oldest and youngest grandmother and Mrs. Hummel gave each guest of honor a pretty flower favor.

Several rural projects are under way in the Champion N. E. and N. W. sections of Little Bow Constituency and many hitherto unemployed men are working on the road for prosperity bonds. Most of the local merchants are co-operating by issuing supplies to road camps and workers on the credit of prosperity bonds and a start has now been made towards the introduction of Social Credit.

Mr. and Mrs. Henry Harris and Miss Nettie Huser of Grand Junction, Colorado and Mrs. Dougherty of Blackwell, Oklahoma, who have been visiting at the home of Mr. and Mrs. A. W. Jopling for the past three weeks, left Sunday for their homes. The return trip was made by way of Glacier, Yellowstone and Denver.

Miss Margaret Spankie left Sunday on a two weeks holiday.

Celebrate 50th Anniversary

Featured by a congratulatory telegram from His Majesty King Edward VIII, and in the presence of dignitaries of the state, outstanding speakers of the business and social world, railway officials and several thousand citizens, the Canadian Pacific Railway on Sunday, June 28, celebrated the 50th anniversary of the departure of the first transcontinental passenger train, from Montreal to the Pacific Coast. The first passenger train to cross the continent, entirely in Canada, left Montreal on June 28, 1886, amid the acclamations of the entire nation.

The royal passage, which was the highlight of the jubilee anniversary celebration on June 28, was as follows: "I sincerely thank all those engaged in the Canadian Pacific Railway Company for their loyal assistance on the occasion of the 50th Anniversary of this great Railway which ever since its inception has played so notable a part in the development of the

Dominion of Canada." Transmitted to the company in the name of Sir Edward Beatty, G.C.M.G., K.C., chairman and president, by His Excellency Lord Tweedsmuir, the Governor-General of Canada, it served as the mark to fire the enthusiasm of the notable assembly of several thousand at Windsor Station. The programme, colorful and impressive, was broadcast on a coast-to-coast network of the Canadian Radio Broadcasting Commission, and was completely recorded in still and moving pictures. In addition to the messages from His Majesty and the military ceremonies, it included a message from Sir Edward Beatty, G.C.M.G., K.C., chairman and president, addresses by D. G. Coleman, vice-president of the company, His Worship Mayor Camille Houde of Montreal, Hon. Marguerite Blais, who is the daughter of the third president Lord Bessborough, T. M. B. Roberts of the Pittsburgh Steelman, D. D. Graham of the London

Three and others, Mrs. Camille Houde, Mayors of Montreal, cut a birthday cake six feet in diameter and nine feet tall. The Victoria Rifles of Canada, which supplied the Guard of Honor when the first train for the Pacific left 50 years ago, again supplied the Guard of Honor under Colonel I. W. Eakin. The band of the regiment, in addition to its concert music, played God Save the King as the Guard presented the Guard of Honor under Colonel I. W. Eakin. The band of the regiment, in addition to its concert music, played God Save the King as the Guard presented the Guard of Honor under Colonel I. W. Eakin. The band of the regiment, in addition to its concert music, played God Save the King as the Guard presented the Guard of Honor under Colonel I. W. Eakin.

The celebration was continued at Ottawa and all main-line points en route to Vancouver and thousands came down to the suburban stations to catch a fleeting glimpse of the decorated anniversary train.

Home Markets For Local Produce

Assuming that a statement appearing recently in the daily press is correct, it seems an anomaly that a country so well equipped in many sections to produce wool as Canada should have to import that commodity from other countries.

Yet such apparently is the fact if credence can be given to the published assertion of R. McInerney of Toronto, Assistant Trade Commissioner for Australia to Canada when he said in a recent interview that "Canada is Australia's third best wool customer."

Not only are the western provinces well suited to wool production, both on large scale on the ranches in southern areas of Saskatchewan and Alberta, and in all three prairie provinces on smaller scale from farm flocks, but it is generally conceded by authorities that conditions in these provinces enable Western Canada to produce wool of quality equal to the best anywhere.

Time was, not much more than a decade ago, when a substantial percentage of Western Canadian fleeces were offered to the market in poor condition. The fleeces were of the standard of the product has been vastly improved, so much so, in fact, that an unskilled fleece in shipments for market from the prairies is a comparative rarity today.

That being the case, it can be asserted with confidence that Western Canada can produce additional quality wool for domestic requirements in addition to considerable quantities annually for export, and the producer is now complying with market requirements in the preparation of his product.

Why, then, should it be necessary for Canada to import wool from other countries such as Australia and the Argentine? In the light of the facts, that appears an unanswerable question.

Another anomalous factor in the Canadian wool industry is the fact that although Eastern Canadian woolen mills are equipped with machinery to produce tops (wool in a partly manufactured condition) the machines are standing idle while tops are being imported from Great Britain. The reason, it is explained, is because tops can be manufactured more cheaply in England than in Canada. This is a plausible explanation, though the situation is an unfortunate one for this country, when it is remembered that there are plenty of idle workmen still in the East.

The anomalous situation at the production end, however, is one which should lead to some inquiries in the hope that the cause for a country like Canada importing wool can be discovered and, if feasible, rectified.

The statement made by the assistant trade commissioner for Australia engenders the thought that possibly there is room for considerable development of the domestic market for other Western Canadian agricultural products, and inspires the question whether everything that is possible is being done to ensure absorption of home products in local markets to the greatest possible extent. If other agricultural products are subjected to competition of similar imported commodities, it is a very unfortunate thing for the producers, and especially is this the case at a time when farmers are turning to greater diversification because they are forced to it by the European wheat situation.

Perhaps the solution to the problem of finding wide domestic markets for home grown products lies in the laboratory and this is a question worthy of investigation by farmer organizations, boards of trade and similar institutions and the governments.

There are men today working quietly in private laboratories seeking means to extract by-products from wheat and other agricultural products, of which Western Canada has a great abundance, capable of conversion into fuels, clothing and other necessities and there is no doubt there is great opportunity for more such work along these lines.

The work of some of these men leads to the belief that therein may lie at least a partial solution of some of the west's agricultural problems. It is stated, and not without authority, that the use of the manufacture of these commodities on a commercially feasible basis, has been wrested from test tubes and retorts and other paraphernalia of chemical and electrical engineering laboratories, and that all that is needed to make them a marketable reality is not inconsiderable capital. Where this is to be found for such projects is another question.

Thanks To Stamp Collectors

Heavy Purchases Financed Part Of Digbridge Around World

It was stamp collectors' heavy purchases of Hindenburg commemorative stamps that made the recent flight of the big dirigible to this country possible. Dr. Hugo Eckener told an audience of New York stamp collectors.

The famous designer said that seven flights were paid for only with the help of the stamp collectors and that they paid the whole expense of the famous trip around the world.

Explorers and pioneers in transportation of all sorts have a source of support in the stamp collectors of the world these days, and the collectors welcome the chance to share in the expense if it means a commemorative cover, suitably marked, for such a thing can never be duplicated, and is likely to increase in value. What a help a few thousand stamp collectors would have been to Columbus! — Port Arthur News-Chronicle.

A water drop cannot rise above the level of the water it is in, the sun which it is a part unless the sun's rays draw it up or unless it is driven by mechanical power, as is a spraying fountain.

Cotton and artificial silk material are being made by a process that insures it against wrinkling.

Expert In X-Ray Work

People One Heavy Debt To Kill Of A Woman

Every war veteran whose life was saved by X-ray location of a bullet in his body, every civilian whose hidden abscess beneath a tooth has been found by X-ray, owes a debt to the skill of the dental experts of Elizabeth Fleischman Ashheim. This woman, who has been called an American Joan of Arc, was not a physician but became interested in X-ray work through a doctor brother-in-law.

She took a course in electrical fluoroscopy, rendered valuable aid to the Army during the Spanish-American War, and showed by the excellence of the diagnostic X-ray pictures she took how much X-rays could add to military surgery. After the war she saw the possibilities of X-rays in dental work and was busy with this for the few remaining years of her life. — Quebec Chronicle-Telegraph.

A music-hall magician opens his act by guaranteeing to tell the exact age of any lady in the audience. The remainder of his turn is quite popular, though.

Church is the only place you have to be early to get a back seat.

And the darkest hour is just before the dawn. 2159

Great Change Taking Place

Women Drifting Away From Kitchen Work Shows

The average American woman is drifting further from her traditional place in the kitchen, according to a survey made by Quenn, an honorary scientific fraternity for women at the University of Pittsburgh.

The scientific co-eds came to their conclusions while studying problems encountered in a quest of employment. Their detailed survey represented an effort to clarify and classify the many-sided aspects of job-seeking and their relationship with the university graduate.

Interviews, letters and telephone calls to and from a thousand personnel directors of business organizations and public institutions revealed that many positions are waiting for trained women.

Opportunities are available, it was found, in a wide variety of business, educational and scientific spheres. Almost every branch of city, state and federal departments indicated that women, especially those trained in science, are needed.

The many possibilities indicated almost every phase of activity except that centred by the kitchen. The fate of the family's meals, it was indicated, is facing highly uncertain times.

Extension Of Trade

Says Canada Should Co-operate With The Rest Of The World

Canada's aim should be greater development of trade with Great Britain, Hon. G. H. Ferguson told the Galt Kewlands Club.

While advocating extension of trade, the former high commissioner to London said Canada can never follow a policy of isolation. Canada should co-operate with the rest of the world for its betterment and advancement. Britain has the greatest market in the world and the Dominion should capitalize to the full extent on this fact, he said.

As speaker predicted, the Dominion would soon be a dominant trade nation once again and said the close connection between Canada and Great Britain has been an immense advantage. He paid tribute to the foresight and purpose of the fathers of confederation who were "not dreamers but practical builders."

Drouth Stricken Areas

To Expand Drouth Rehabilitation Work In The West

Under the impetus of extension of drouth-stricken areas in Western Canada, the Dominion government has decided to expand its drouth-rehabilitation work in the west.

Hon. J. G. Gardiner, minister of agriculture, said financial assistance would be given farmers in the digging of "dugouts" or reservoirs of water for stock. This season's assistance will now be given to water conservation projects.

The basis of assistance to digouts is three cents per cubic foot. It moved up to a maximum of \$50. In all cases the government provides engineering advice and all assisted projects must be approved by engineers.

Assistance on the same basis is provided for the construction of small dams.

Great Difference In Weight

Small And Large Parcels Sent Recently By Air Freight

Contrast in United States air freight traffic was shown the other day when a parcel weighing only two ounces and another weighing 500 pounds were transported.

The two-ounce package was a single false tooth the owner of the tooth, behind in a hotel bedroom, afterwards wireless an urgent message to have his forgotten "filler" rushed to him. The mining machine crank shaft made up the 500-pound "parcel."

Another strange consignment was sent by a surgeon in Mexico. It was a tiny piece of living tissue and was rushed to New York for analysis. Laboratory workers carried out their tests and results were telegraphed to the surgeon.

Coronation Plans

Duke Of York Heads Committee In Charge Of Arrangements

The Duke of York will head the committee in charge of plans for the coronation next May 12, The London Gazette announced.

The committee includes Prime Minister Baldwin, the Archbishop of Canterbury and X-ray, Chancellor of the Exchequer Neville Chamberlain, the Earl of Athlone, Sir Samuel Hoare, David Lloyd George, Winston Churchill and Sir Austen Chamberlain.

Tragedy In Northern Seas

Russian Scientists Succumb To Cold And Hardships

Twenty-year-old Ian Kruckhoff related the story of a grim voyage through the wind and icy waters of the White sea with a cargo of 30 dead men.

Kruckhoff was the lone survivor of a party of 12 all members of a scientific expedition. He reached safety in a lifeboat loaded with the bodies of 10 of the others. The 11th was not recovered.

The 12, headed by the hydrographer, G. Hardinoff, left the expedition's steamer Toros on June 27 in a small boat to make a study of the depth of the sea between Archangel and Kamshatska bay, on a route crossing the Arctic circle.

"After three days' work," said the youth, "we decided to return to the ship."

"We were caught by a storm. Mountains waves capized the boat and swept away the oars, equipment and our comrade Nikolai Fedoseyev, whom we never saw again. Struggling in the water, the rest of us with great difficulty managed to right the boat and climb in."

"Then for a day and a night we went out and exhausted ourselves. We had no oars; we tried frantically to row with our hands. The boat constantly shipped water. We worked it up with our hands and our caps. It was horribly cold. One after another, my companions died."

"I sat out and exhausted myself until I was left alone with 10 bodies. The sea grew rougher, and it was only by trying my right wrist to the carlock that I was able to steer the boat."

From Siam To Surrey

Ex-King Prajadhipok Has Settled Down In England

Ex-King Prajadhipok of Siam has just moved into his new home, on which he spent \$100,000 in improvements, in Surrey, England. It is a red brick house, standing in 15 acres of gardens, and it has four reception rooms, 12 bedrooms and six bathrooms. Every one of the rooms has been specially designed and furnished.

The dining-room is in the Queen Anne style, the drawing-room in late Queen Anne. The other rooms are more modern. A motion picture theatre has also been built in which the family entertains visitors. Prajadhipok says the latest talking films, and favors American gangster pictures.

SELECTED RECIPES

BANANA CAKE

1 1/2 cup butter
1 cup white sugar
2 eggs
4 tablespoons sour milk
1 teaspoon soda
1 1/2 cups Partly Flour
2 teaspoons baking powder
1 1/2 teaspoon salt
1 teaspoon vanilla
1 cup mashed bananas

Method: 1. Cream butter; add sugar. 2. Add well-beaten eggs. 3. Add bananas and vanilla; beat well. 4. Dissolve soda in milk. 5. Mix flour with baking powder and salt and add, alternately, with milk to mixture No. 3. 6. Bake in loaf tin 50 minutes in moderate oven of 350 degrees.

Emigrant: (Writing back home) "And all the way across the long train journey was so tiresome that I don't keep shouting at every stop 'More, more, more.' We were too busy we didn't say nothing."

Tall men live longer than short men, thin men longer than fat, married men longer than bachelors, and vegetarians longer than carnivorous men, according to statistics.

The word rosary is derived from the Latin rosarium, which was originally a garland of roses and used to crown the image of the Virgin Mary.

House Flies Breed In Garbage

Dangerous Disease Carriers Menace To Public Health

For many years public health officers have reduced the scourge of typhoid fever and many other dangerous, contagious diseases by government enforced legislation in respect to the inspection of cattle, milk-pasteurization, the chemical purification of suspected water supplies, and the elimination of many other known breeding sources of disease. But little has been done officially about the common house-fly. Each summer it infests the land wherever mankind exists. It is borne and bred in rotten animal or vegetable matter, lives on filth and refuse. It carries germs of infectious diseases into the home endangering the health of everyone. In the defenseless baby in its crib to the elders of the house who relish the tasty salad, upon which a fly may have recently been feasting and spreading disease germs that have accumulated on its hairy legs.

Public spirited citizens should fully realize the seriousness of this menace and take measures to check it. Searching out hidden unsanitary fly breeding places, keeping homes well screened and foods covered at all times are important. But the quickest and simplest method of killing flies is to place a few saucers of Wilson's Fly Plac around the house. They will attract the flies and kill them in a few hours.

The Court Of Claims

Begins Its Sittings After Coronation Date Is Set

After the Coronation date is set, the strangest Court in the world begins its sittings in London. The Coronation proclamation set up the Court of Claims. It considers pedlars and hereditary rights to serve the King in person.

Some claims which have come before the Court are:

To support the King to the altar. To carry the Great Spurs (part of the Coronation regalia).

To carry the Cap of Maintenance. To drink the King's wine as a guard against poisoners.

To have the bed which the King sleeps on the night before he is crowned.

Three claims which are likely to be allowed are those of:

The Earl of Shrewsbury, as Lord High Steward of Ireland, to carry a white wand as symbol of his office.

The Baron of the Cinque Ports to hold a canopy over the King's head at the Abbey.

The Lord of the Manor of Woking to present to the King a pair of fine gloves.

Plan Crime Hospital

Scheme Is Suggested By Several Prominent British Physicians

A movement to found a "crime hospital" where criminals may be sent for psychological treatment instead of being imprisoned, has been launched by Lord Dawson of Penn and several other prominent British physicians and psychologists. Officials of the home office are said to be in sympathy with the scheme, which they believe may lead to revolutionary changes in the state's attitude on crime. An appeal for \$50,000, with which to build a clinic in London, is being made.

Plan Huge Liner

New Vessel To Be Longer And Larger Than The Queen Mary

Preparations for constructing a bigger and faster companion to the 8.5 Queen Mary were begun tentatively on the Clydebank. In shipping circles it was said the liner, if constructed, would probably be christened the King George V.

An official order for the construction of the liner is awaited. It was suggested the projected liner would have a tonnage of about 85,000 as compared to the 80,773 of the Queen Mary.

An official of the John Brown Company which built the Queen Mary for the Cunard-White Star Line said: "We are almost certain to be given a tender although we have not received an official confirmation from the Admiralty."

The company had expected to receive an order for a battleship, but it was understood the admiralty work would be spread instead to other shipbuilders in North England to leave the John Brown Company free for the liner.

Cunard-White Star officials have been inspecting models of the proposed liner while experts have prepared altered and revised engine designs.

A Brown official said, "The new ship will be larger than the Queen Mary and faster."

It was understood that present plans call for a longer ship with greater passenger accommodations.

The ship, it was said, would probably be placed in commission in 1938.

The Left Turn

Care Should Be Exercised In Making Turn At Road Intersections

A well known writer has estimated that a large proportion of auto accidents are caused by neglect of drivers to observe ordinary care in making a left turn at street and road intersections. The following points are noted:

If you desire to turn to the left do not approach the intersection on the extreme right of the street or highway but keep close to the centre of the road. If you approach on the extreme right you may turn to the left just as another car is coming up on your left.

Do not turn to the left close to the centre of the intersection but continue across the intersection until you are almost directly opposite the right side of the intersecting road or street, then turn to the left. If you turn to the left at the centre of the intersection you are in danger of meeting head on, a car coming up from your left.

We must turn to the proper signal a reasonable time before you come to the intersection so that cars coming from behind are prepared for what you intend to do.

Even if the road or street is not marked with a strip up the centre, there are two imaginary strips on every road and street—the right and the left. On every right or left strip there are one, two or even three lanes. Keep on your own strip and in your own lane is the best advice possible to avoid accident.

Old tramped bones, discarded in favour of trolley-buses in various parts of London, can be bought at the depot for \$10 each; carting them away is the real expense.

The Champion Chronicle

L. A. STARCK
Editor and Publisher

Thursday, July 10, 1936

Mr. and Mrs. C. McLean and Mr. and Mrs. G. K. McLean returned Saturday from a two weeks holiday spent on the west coast. The trip was very enjoyable, excepting for the weather, which they found a little too warm for motoring.

Report of Hospital meeting next week.

Card of Thanks

In due appreciation of the sympathy expressed the floral tributes and to the Masons and Eastern Star of Champion and Valeau, we wish to express our sincerest thanks for the kindnes extended at the passing of James Moran Reebuck.

A. and T. Reebuck and families.

Card of Thanks

Mr. and Mrs. I. D. Ditto wish to thank their many friends and neighbors for the beautiful flowers and gifts sent to Mr. Ditto, also the many kindnesses shown him during his recent illness.

F. G. Beaumont, Barrister of Carmichael will be at the Chronicle office every Tuesday morning.

Crops in the Champion district are suffering severely from the drought. Early sown crops are badly scorched. There are a few fields that are standing up remarkably well and despite the drought, give promise yet of a fair to good yield. Crops, where summer fallows were disked early in the spring, plowed early in June and later cultivated are holding up the best. This method of summer fallowing will undoubtedly be favored by the majority of farmers for conserving moisture. Gardens and pastures are burned.

The Harmony Bluebirds journeyed to Lethbridge Sunday, where they met the Lethbridge Whippets in a double header. The first game was one sided, resulting in a score of 25-5 for Lethbridge. In this game the Bluebirds made several errors, most of which resulted in runs for the Whippets. Much better football was played in the evening game and the fans were treated to some thrilling play. The score was 12-11 in favor of Lethbridge.

On Friday evening Mrs. F. Caldwell was agreeably surprised when a number of ladies from town and district gathered at her home to help celebrate her birthday. After a pleasant evening Mrs. Caldwell was presented with a gift by the ladies present.

Local & General

Born To Mr. and Mrs. Bill Kline on Tuesday at their home a son.

Mr. and Mrs. E. Connolly and family were week end visitors at Waterton National Park.

J. H. Bastin returned Saturday from a two weeks vacation spent in Calgary and Millerville.

The Caldwell family accompanied by Ada Williamson went to Browning, Montana for the week end.

Miss Edna McNaughton left last week for Medicine Hat, where she will spend a short holiday.

Mr. and Mrs. Fred Wise visited Cluny on Sunday and returned with buckets laden with Saskatoon.

Miss E. Bowman and J. Bowman took advantage of the excursion and were Stampede visitors, Friday.

Mrs. Lorena Chamberlain and Mrs. C. Boner of San Francisco are spending two weeks visiting in Champion.

Mr. and Mrs. J. A. Kulpas returned late Tuesday night from their motor trip to the coast and other points.

Mr. and Mrs. W. A. McLarty, Mr. and Mrs. G. K. McLean and P. Stinson of Valeau, spent Sunday in Lethbridge, golfing.

Jack arrived, a grand lot of lovely Summer Dresses in Voiles, Pastels and Crepes, sizes up to 14 at Campbell's.

Miss Lona Stephenson is spending a short holiday visiting at the home of Mr. and Mrs. Gordon House, in Calgary.

Mr. and Mrs. Fred Watts and daughter started Wednesday on their holidays that they will spend at Banbury, Mr. Watts' old home.

Miss Flo Gill is now a member of the local telephone staff, having filled the vacancy left by Miss Phyllis Bastin, who was recently married.

Miss Florence Woodhall returned to Lethbridge Friday having spent the past month at the home of Mr. and Mrs. Harvey C. Jopling.

There will be a service of Holy Communion in the Community Hall at 11 a.m., with a consideration of "The Sermon on the Mount" by Rev. T. B. Winter.

Among Stampede visitors Saturday were: Mr. and Mrs. E. Clever, Mrs. Lauretta Clever, Mr. and Mrs. M. G. Clever, Geo. Cross, C. McCullough and P. Bouzay.

Alex. Luff, Harry Taylor, Don Campbell and Robert McCullough left Sunday by motor for Sylvan lake where they will spend the next week holidaying.

Mrs. J. D. Henderson and Stuart accompanied by Mrs. G. L. Deane spent a few days last week visiting at the home of Mr. and Mrs. W. A. Cook at Glenora.

Gay Dow, accompanied by Miss Barbara Dow, Miss Margaret Gaudy, Miss Edith Fleming and Laddie Dow, are spending a holiday at Waterton National Park.

Hon. Lucien Maynard spoke in Champion Community Hall Tuesday night and H. O. Haslam at the Alston Hall and public interest is being aroused in those districts and a general desire evinced for more information as to the disposal of the certificates.

Good Minimum Price Needed

The setting of a fair minimum price for wheat by the Wheat board is a matter of primary importance to Alberta and Western Canada. The Alberta Wheat Pool invites the co-operation of all organized bodies who are interested in seeing this decided on broad basis. It is also important that the Federal Government be impressed with the need for the continuation of the Wheat

Board. The experience of 1935-36 crop year shows that the setting of a reasonable minimum price provides a measure of protection for the wheat growers that could have been obtained in no other way. The Alberta Wheat Pool contends that the losses, if any, entailed are trivial as compared with the advantages gained by providing purchasing power for the farmers of the west. A drive to bring about lower wheat prices was frustrated by the Wheat Pools in co-operation with the Federal Government last year. While the situation has changed somewhat and prospects appear brighter for improved prices this year, it is suggested that the welfare of Agriculture needs the steady influence of a substantial minimum price in order to offset adverse movements which may develop later on.

Those Empty Seats

Why Do People Decline To Sit In The Front Rows at Church? Probably there will be no answer to the question, but it should be asked: "Why do people prefer to sit in the back seats at church?" As a rule the front seats are empty. Unless explain that a good many people ask to be shown to a seat "not too far up," or "some place near the back." That leaves a great wide space in front between the preacher and his people, and that in itself is sufficient to dull the fire in the heart of any man. The man in the pulpit must feel at times as though he would like to come down and stand on a seat in front of the congregation where he could be close to them. He must at times grow weary of the isolation to which the back-seats men have doomed him. If he has some fire and brimstone in him, then it will have chance to work before it reaches the occupied pews. If a dozen or 20 people in any church went up and sat in the deserted front seats we believe the minister would at once begin to preach better sermons.

The FIRESIDE PHILOSOPHER

BY ALFRED DIOS

Only those tell all.
No short cut to experience.
Fine but one to fortune is yours.
The listener is as bad as the gossip.
Roll back and you will realize your fate.
Home in business is better than age.
Fortune capitalized often turns the loss.
Calamity which has freedom of speech is slavery.

CHAMPION GROCETERIA

Watermelon, any size, per lb. 5c
Cantaloupes, large size, 2 for 35c
